

WhoisXML API Ranked in Inc. 5000 2024 Fastest-Growing Companies in America

Posted on September 6, 2024

WhoisXML API is proud to be named one of the 2024 [Inc. 5000](#) fastest-growing companies in America once again, specifically ranking 26th in the security category, 281 in California, and 1,847 overall.

The ranking is based on three years of annual revenue growth and has strict requirements, including a minimum revenue of US\$100,000 in 2020 and US\$2 million in 2023.

“We are delighted and honored to be on Inc. 5000 for the seventh year now. What led WhoisXML API to this prestigious list is our entire team’s dedication to helping our customers enrich security platforms and solutions with high-fidelity cyber intelligence to help make the Internet a safer environment for everyone worldwide,” says WhoisXML API CEO Jonathan Zhang.

Our Commitment to Continuous Growth

WhoisXML API has been among the leading providers of Internet intelligence for over 14 years now, helping organizations worldwide understand DNS and domain activity. Among the factors that enable us to continuously provide accurate and up-to-date IP, DNS, and domain data are our AI-enabled global DNS monitoring capabilities and long-term partnerships with large data aggregators. We plan to continue cultivating these relationships to ensure the accuracy and freshness of the data we provide.

So far in [2024](#), we have made significant enhancements to our core products and added more solutions to better meet the evolving security needs of organizations worldwide. Here’s a brief rundown of our latest breakthroughs.

- **Record-breaking data coverage increases:** The past few years have seen substantial

growth in our domain and DNS repositories. Our [Premium DNS Database](#) now covers 116 billion+ historical DNS records, while our [historical WHOIS intelligence](#) has reached 21+ billion records.

- **Faster newly registered domain (NRD) data delivery:** We made substantial improvements to the coverage and quality of our [NRD2 Data Feed](#), specifically tallying an 89% recent increase in total coverage and a 154% increase in activity for the top 10 country-code top-level domains (ccTLDs). On top of that, we launched a “Domains Only” variant of our NRD2 Ultimate package, allowing users to obtain new domain intelligence faster by accessing files containing all domains from the Ultimate data feed, along with those added to or deleted from a given day’s zone files compared with the previous day.
- **Launch of new intelligence packages:** Responding to the urgent need of the cybersecurity community, we developed and launched our Predictive Threat Intelligence and Internet Infrastructure packages. Our [Predictive Threat Intelligence](#) solution is powered by the predictive analytics capabilities of AI and ML. It provides organizations with updated and enriched information about the most common domain threats employed by malicious actors. Meanwhile, our [Internet Infrastructure](#) package provides security teams and solutions the ability to map out all the connections of any web property.

Conclusion

WhoisXML API is committed to providing the best domain, IP, and DNS intelligence and security solutions, as evidenced by the latest improvements and new product packages and solutions. We will continue to innovate and improve our offerings to meet the world’s changing security needs.
